frame

Automated Asset Maintenance, Verification and Compliance Software

Monitor, Measure & Manage
Faster Than Ever Before

Cloud-based
Applications

What is Frame?

Mobile, cloud-based software

Frame is a multi-feature software solution that works with your business to manage your assets and equipment effectively and accurately, in real time. You can customize the paperless software to suit your business and sync it across all devices for complete control over your asset registration, maintenance and management.

Digital Identification

Each of your assets is tagged in the field with a unique QR code or RFID chip and scanned during inspections through our user-friendly mobile app.

Your employees are prompted to record all important information during an inspection against your bespoke checklists and requirements.

Cloud Based Platform

The data is uploaded to our cloud-based platform and your dashboard is updated in real time.

Our solution not only replaces cumbersome paper-based processes but the data gathered is enhanced with employee records, date stamps, geo-tags and photographic proof of each inspection.

Powerful reporting

Powerful reporting gives you access to everything from a holistic overview of your asset portfolio to site reporting and individual KPI data meaning you have traceable verified records of each asset whether it's a crane hoist jack or forklift.

Workflow Enhancements

Auto-fails mean that escalation workflows can be triggered, maintenance scheduled without delay and assets effectively deployed across your network.

Client Testimony

"The savings we get as a result of using Frame, pays for our yearly subscription in one month"

Director, Goscov Access

What Makes Frame Different?

You don't need an asset register to start using Frame, simply on-board your assets as you inspect them.

1. Attach QR code/
RFID tag

2. Scan QR code/RFID tag

3. Identify or create
your zones

4. Identify asset types

5. Complete the
selected checklists

**Digitise your asset maintenance.
Enhance your data.
Ensure safety and compliance.**
